# Amazon Web Scrapping And Visualization

Northeastern University

**PRESENTED BY**

Jay Shukla

NUID: 002619454

# About The Project

- ▶ Use Scrapy to mine data from Amazon
- ▶ Clean the Raw data using Pandas and analyze it
- ▶ Discover meaningful pattern and trends and report on it

# Project Objectives

Amount of product on Amazon is very huge. So my focus: Laptops

## Objective # 1

Scrape data of laptops for different brands

## Objective # 2

Clean the scraped data for analysis

## Objective # 3

Discover pattern and trends

# USE CASES

Pricing Analysis

Customer Insights

Product development  
decisions

Inventory Management

Sales Forecasting

Brand Monitoring

# TOOLS AND TECHNOLOGIES USED

Scrapy

# Amazon Laptop Data

SN	Column Names	Number of data
1	Title	2843
2	Brand	2810
3	Screen_Size	2756
4	CPU_Model	2631
5	Ram	2711
6	Operating_System	2631
7	Rating	2631
8	Series	2501
9	Colour	2501

10	Resolution	182
11	Weight	66
12	USB	35
13	Battery	7
14	Graphics	2063
15	Disk_size	2248
16	Card_desc	2248
17	Price	1863

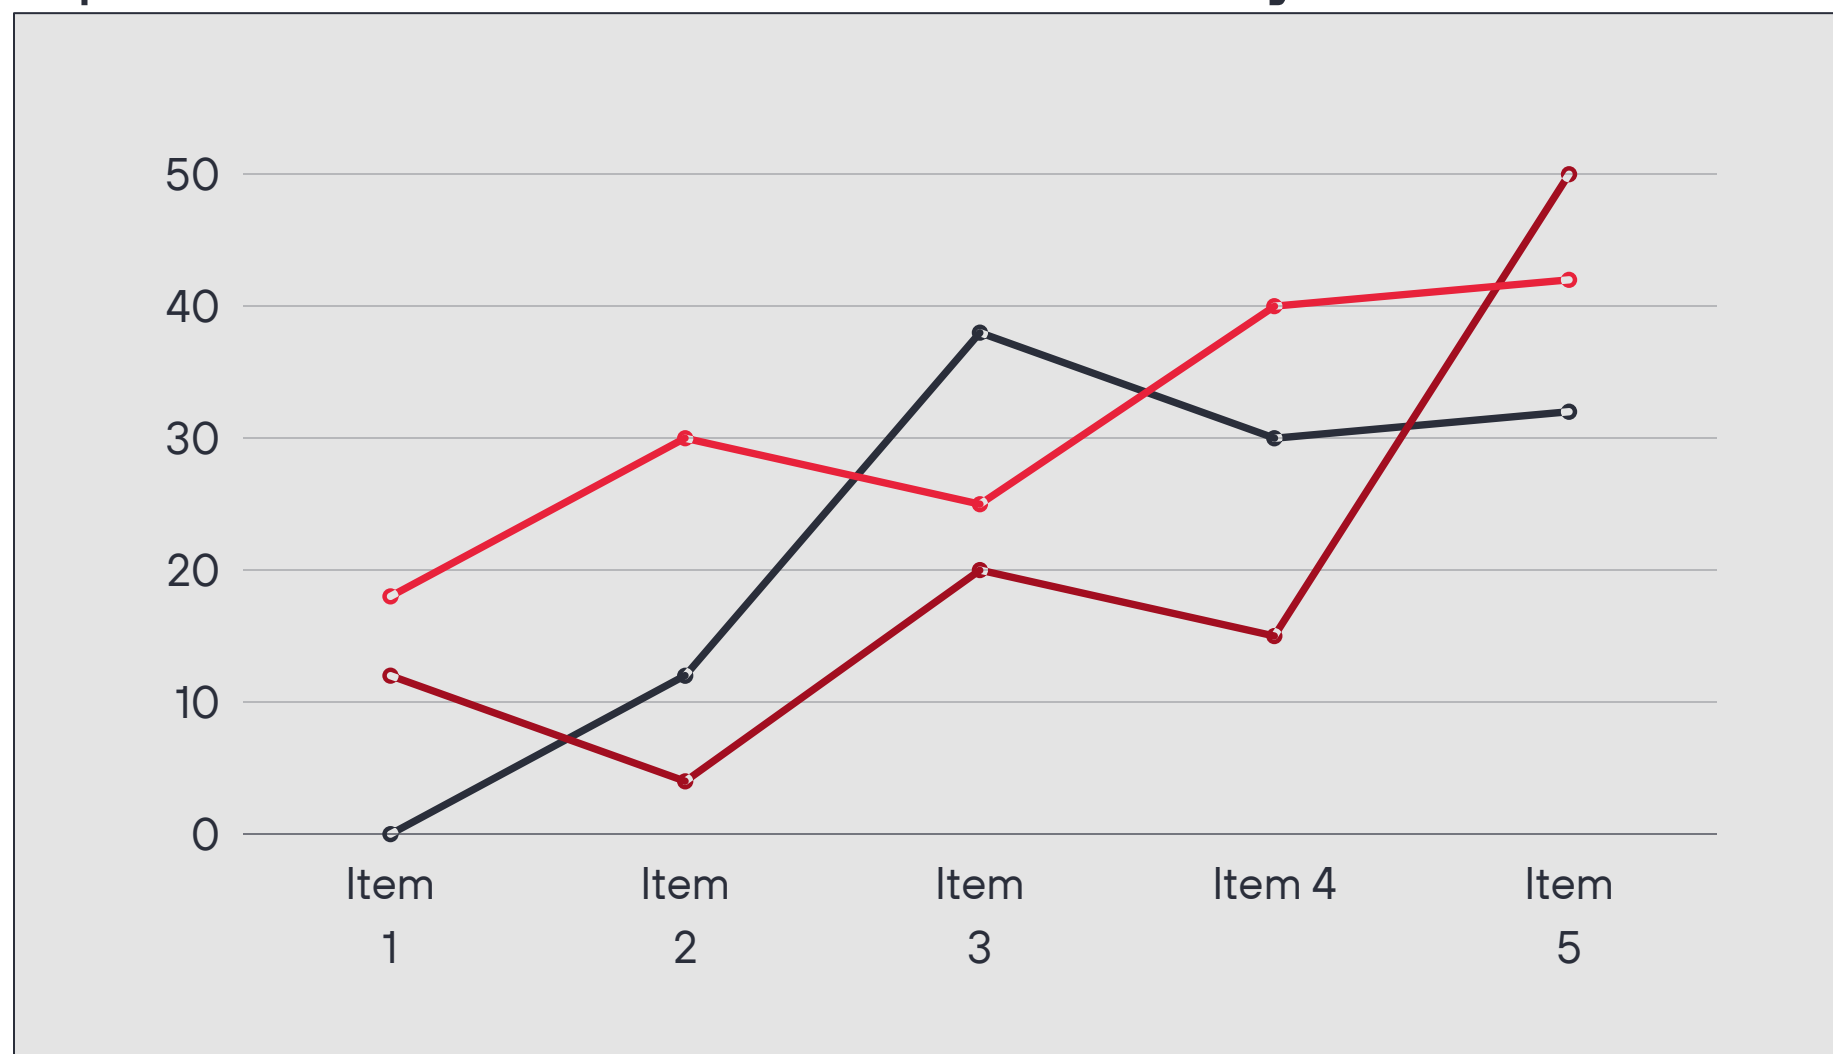

# Data Cleaning

- ▶ Fill nan values in Rating column with 0
- ▶ Drop rows with nan values in other columns
- ▶ Converted data in RAM and Disk\_Size column to numeric values
- ▶ Removed duplicate rows
- ▶ Removed irrelevant Columns/Features

# Data Visualization

## Matplotlib and Seaborn

Open-source data visualization in Python

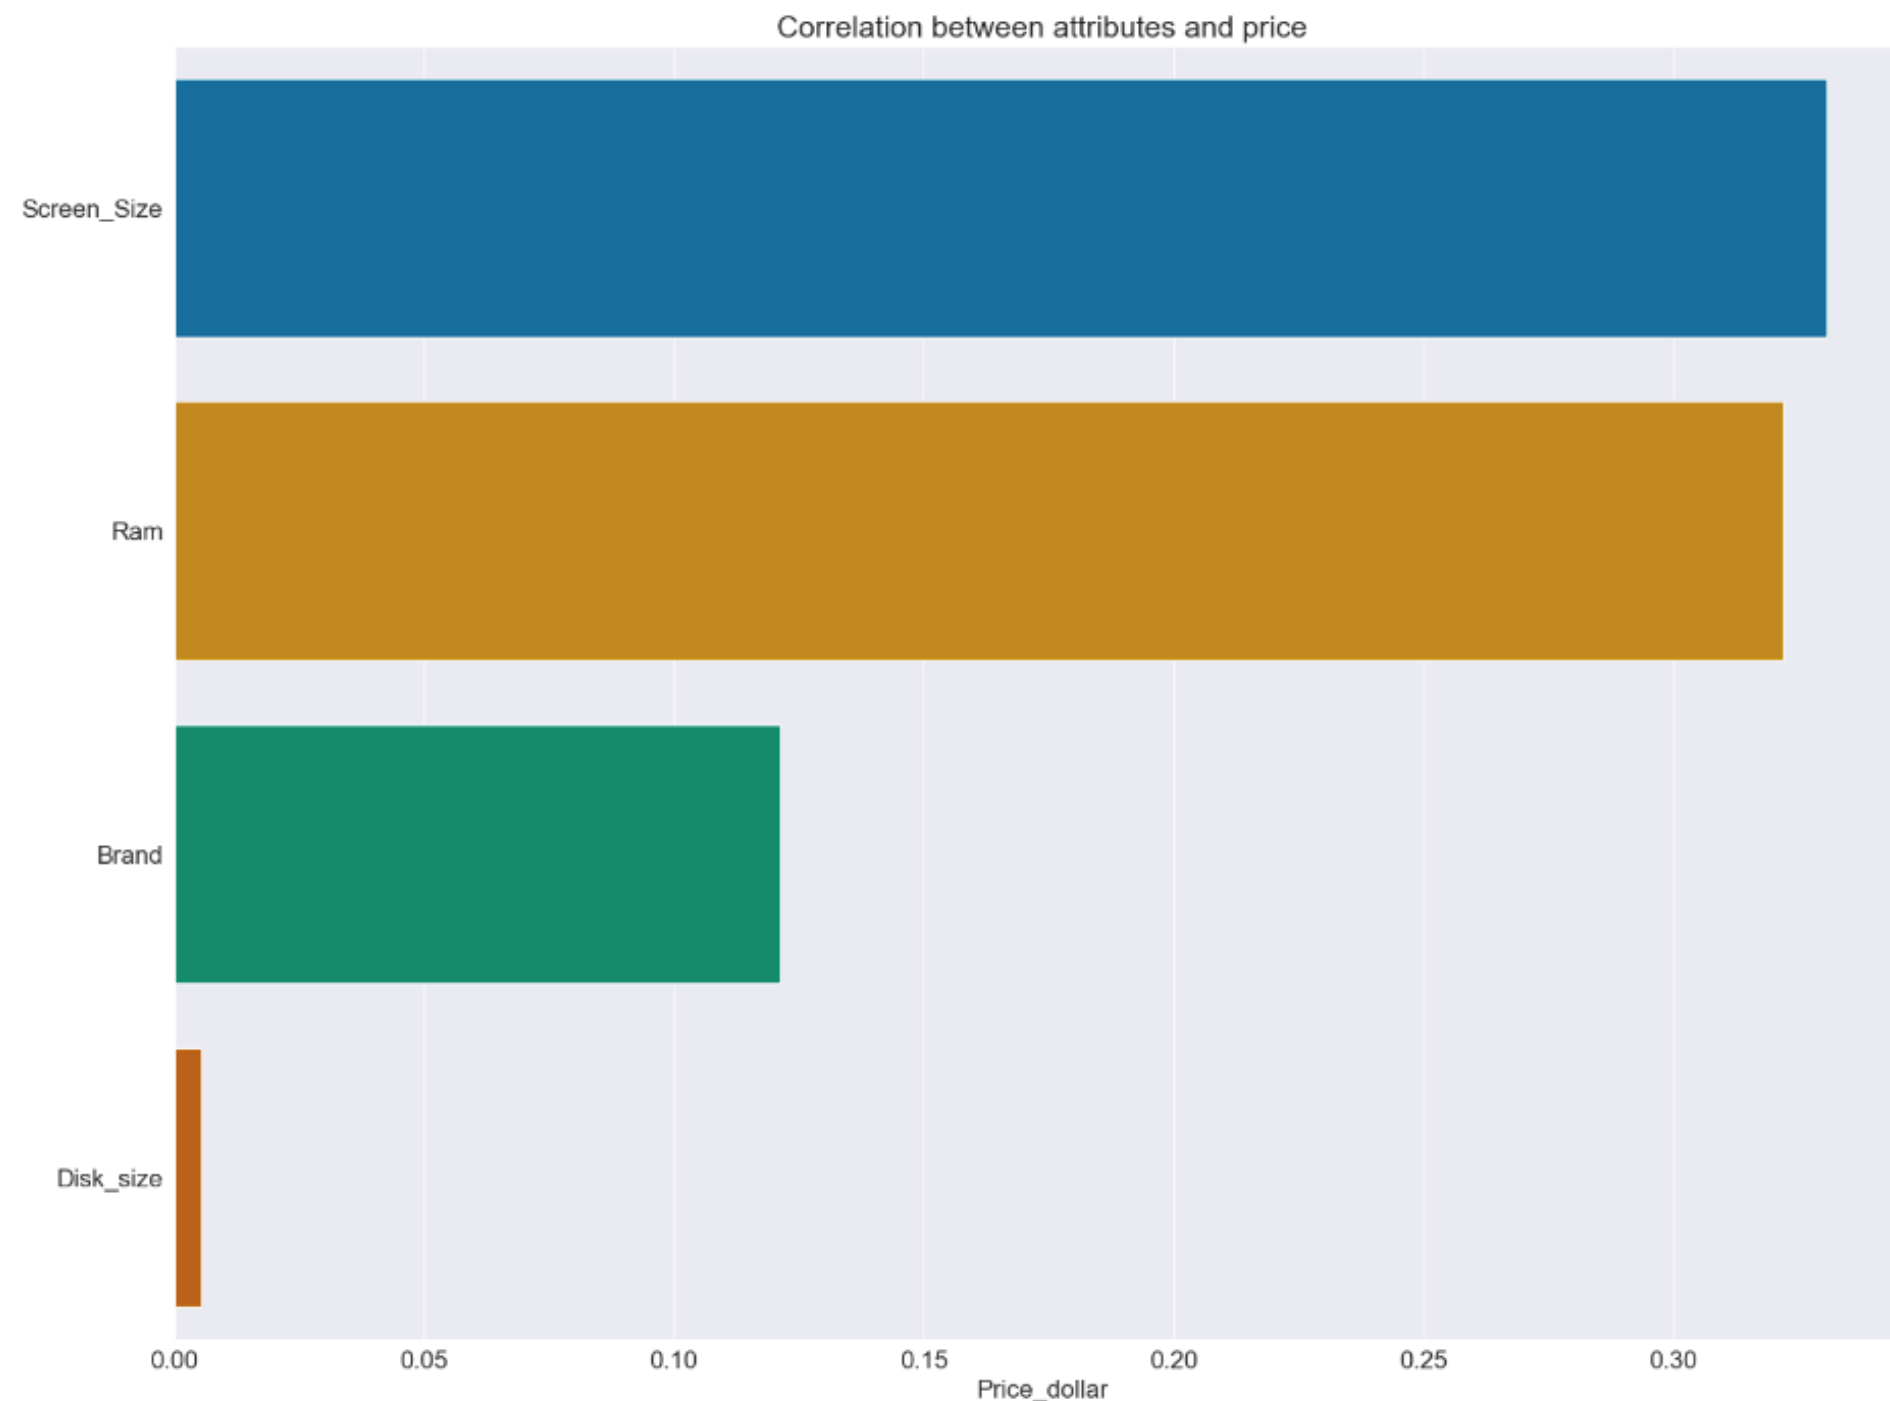

- Generates various types of plots and graphs
- Integrates with other libraries such as NumPy, Pandas.
- Offers customization and high-quality output.

# DATA VISUALIZATIONS

# Correlation

The best attribute appears to be screen size to determine price.

High Correlation

**Screen Size, RAM**

Irrelevant

**Disk Size**

Medium Correlation

**Brand**

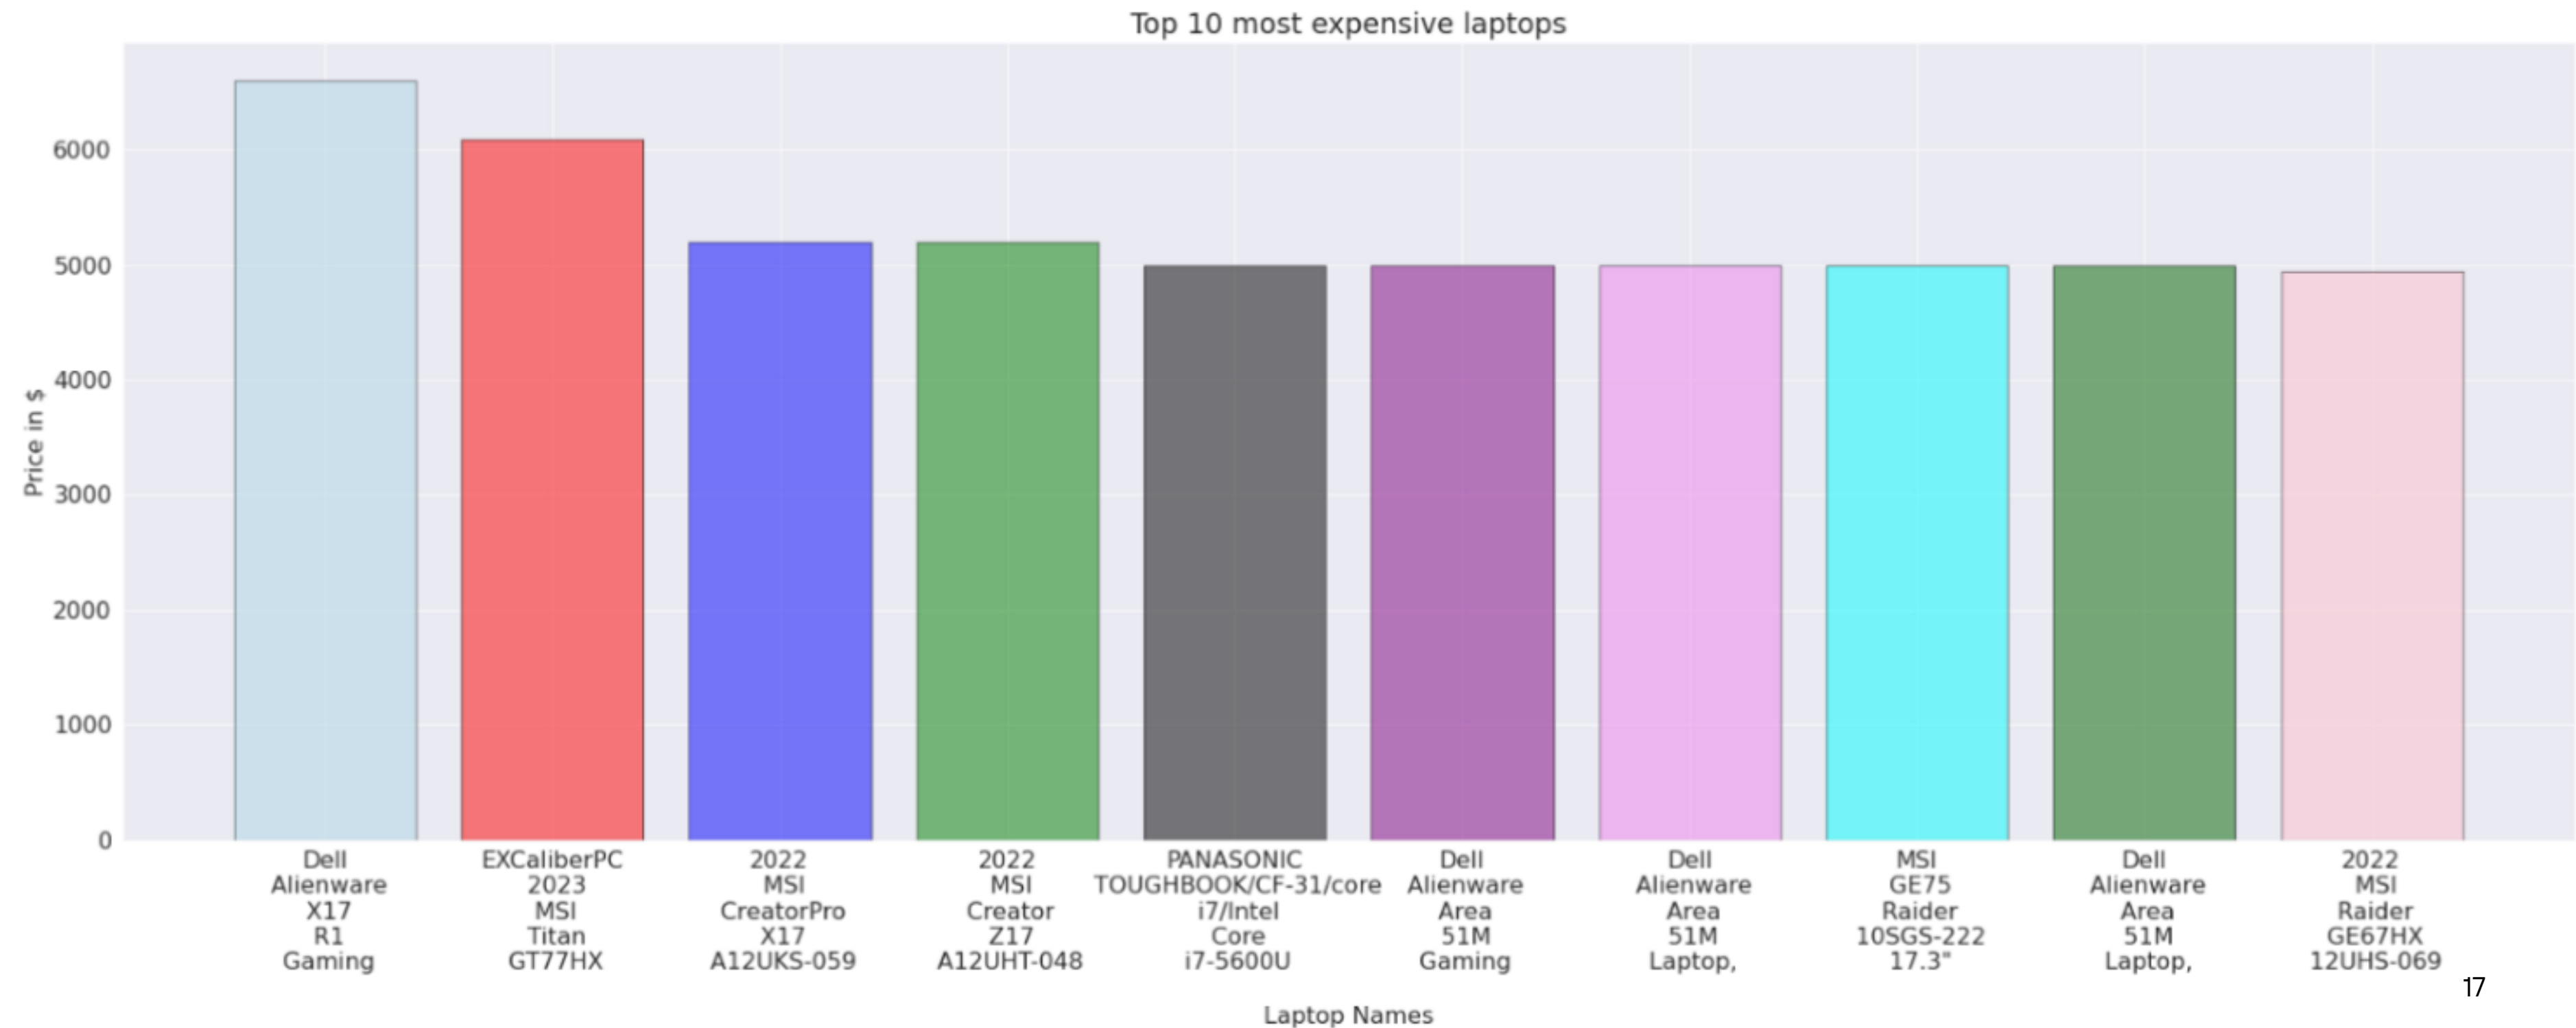

# Correlation Heatmap

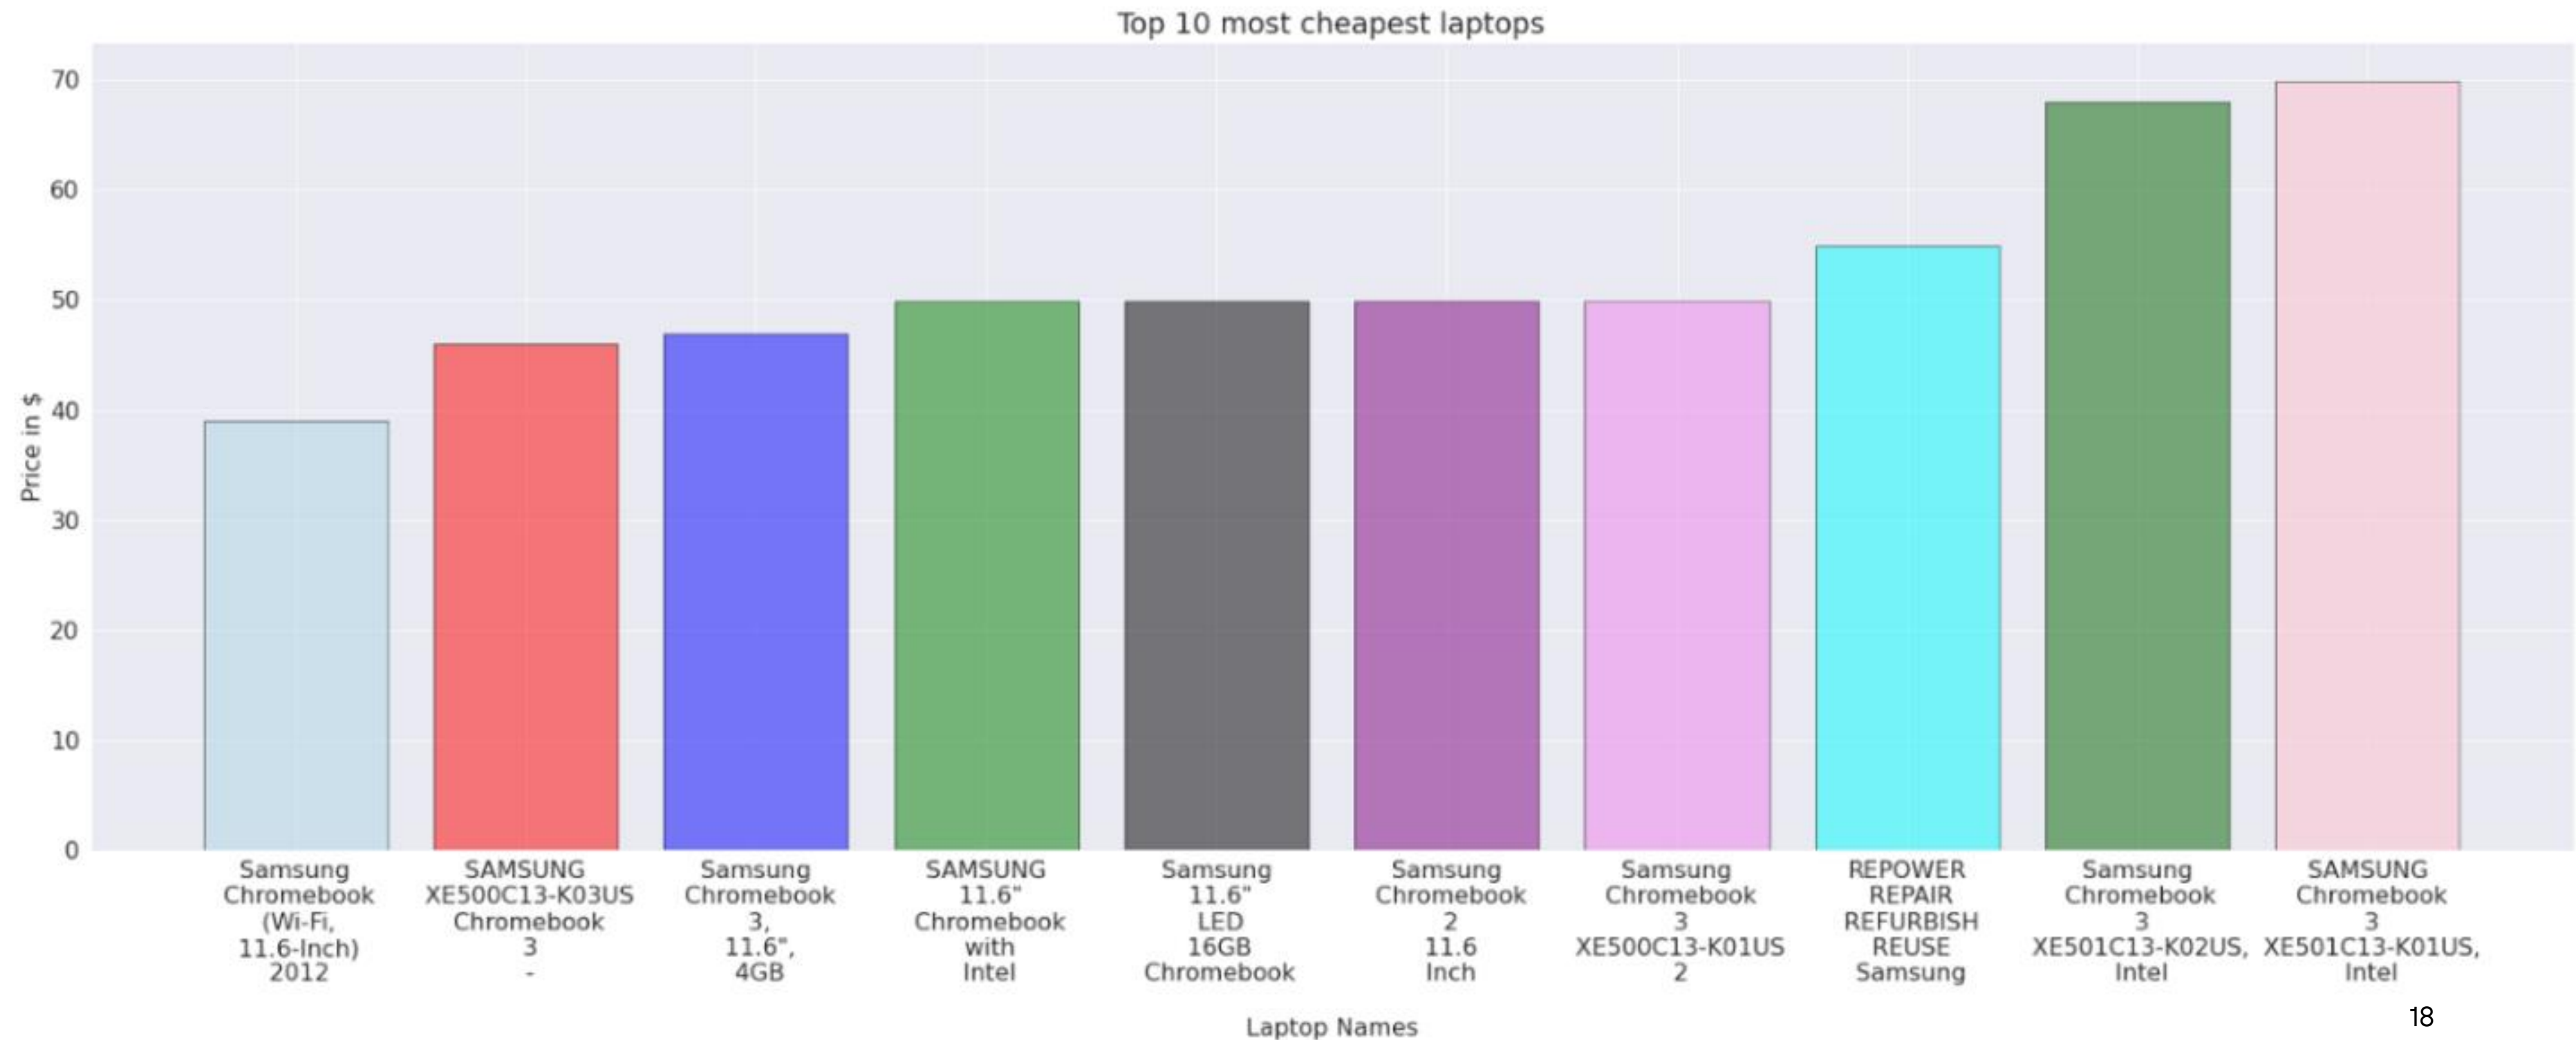

The best attribute appears to be screen size to determine price.

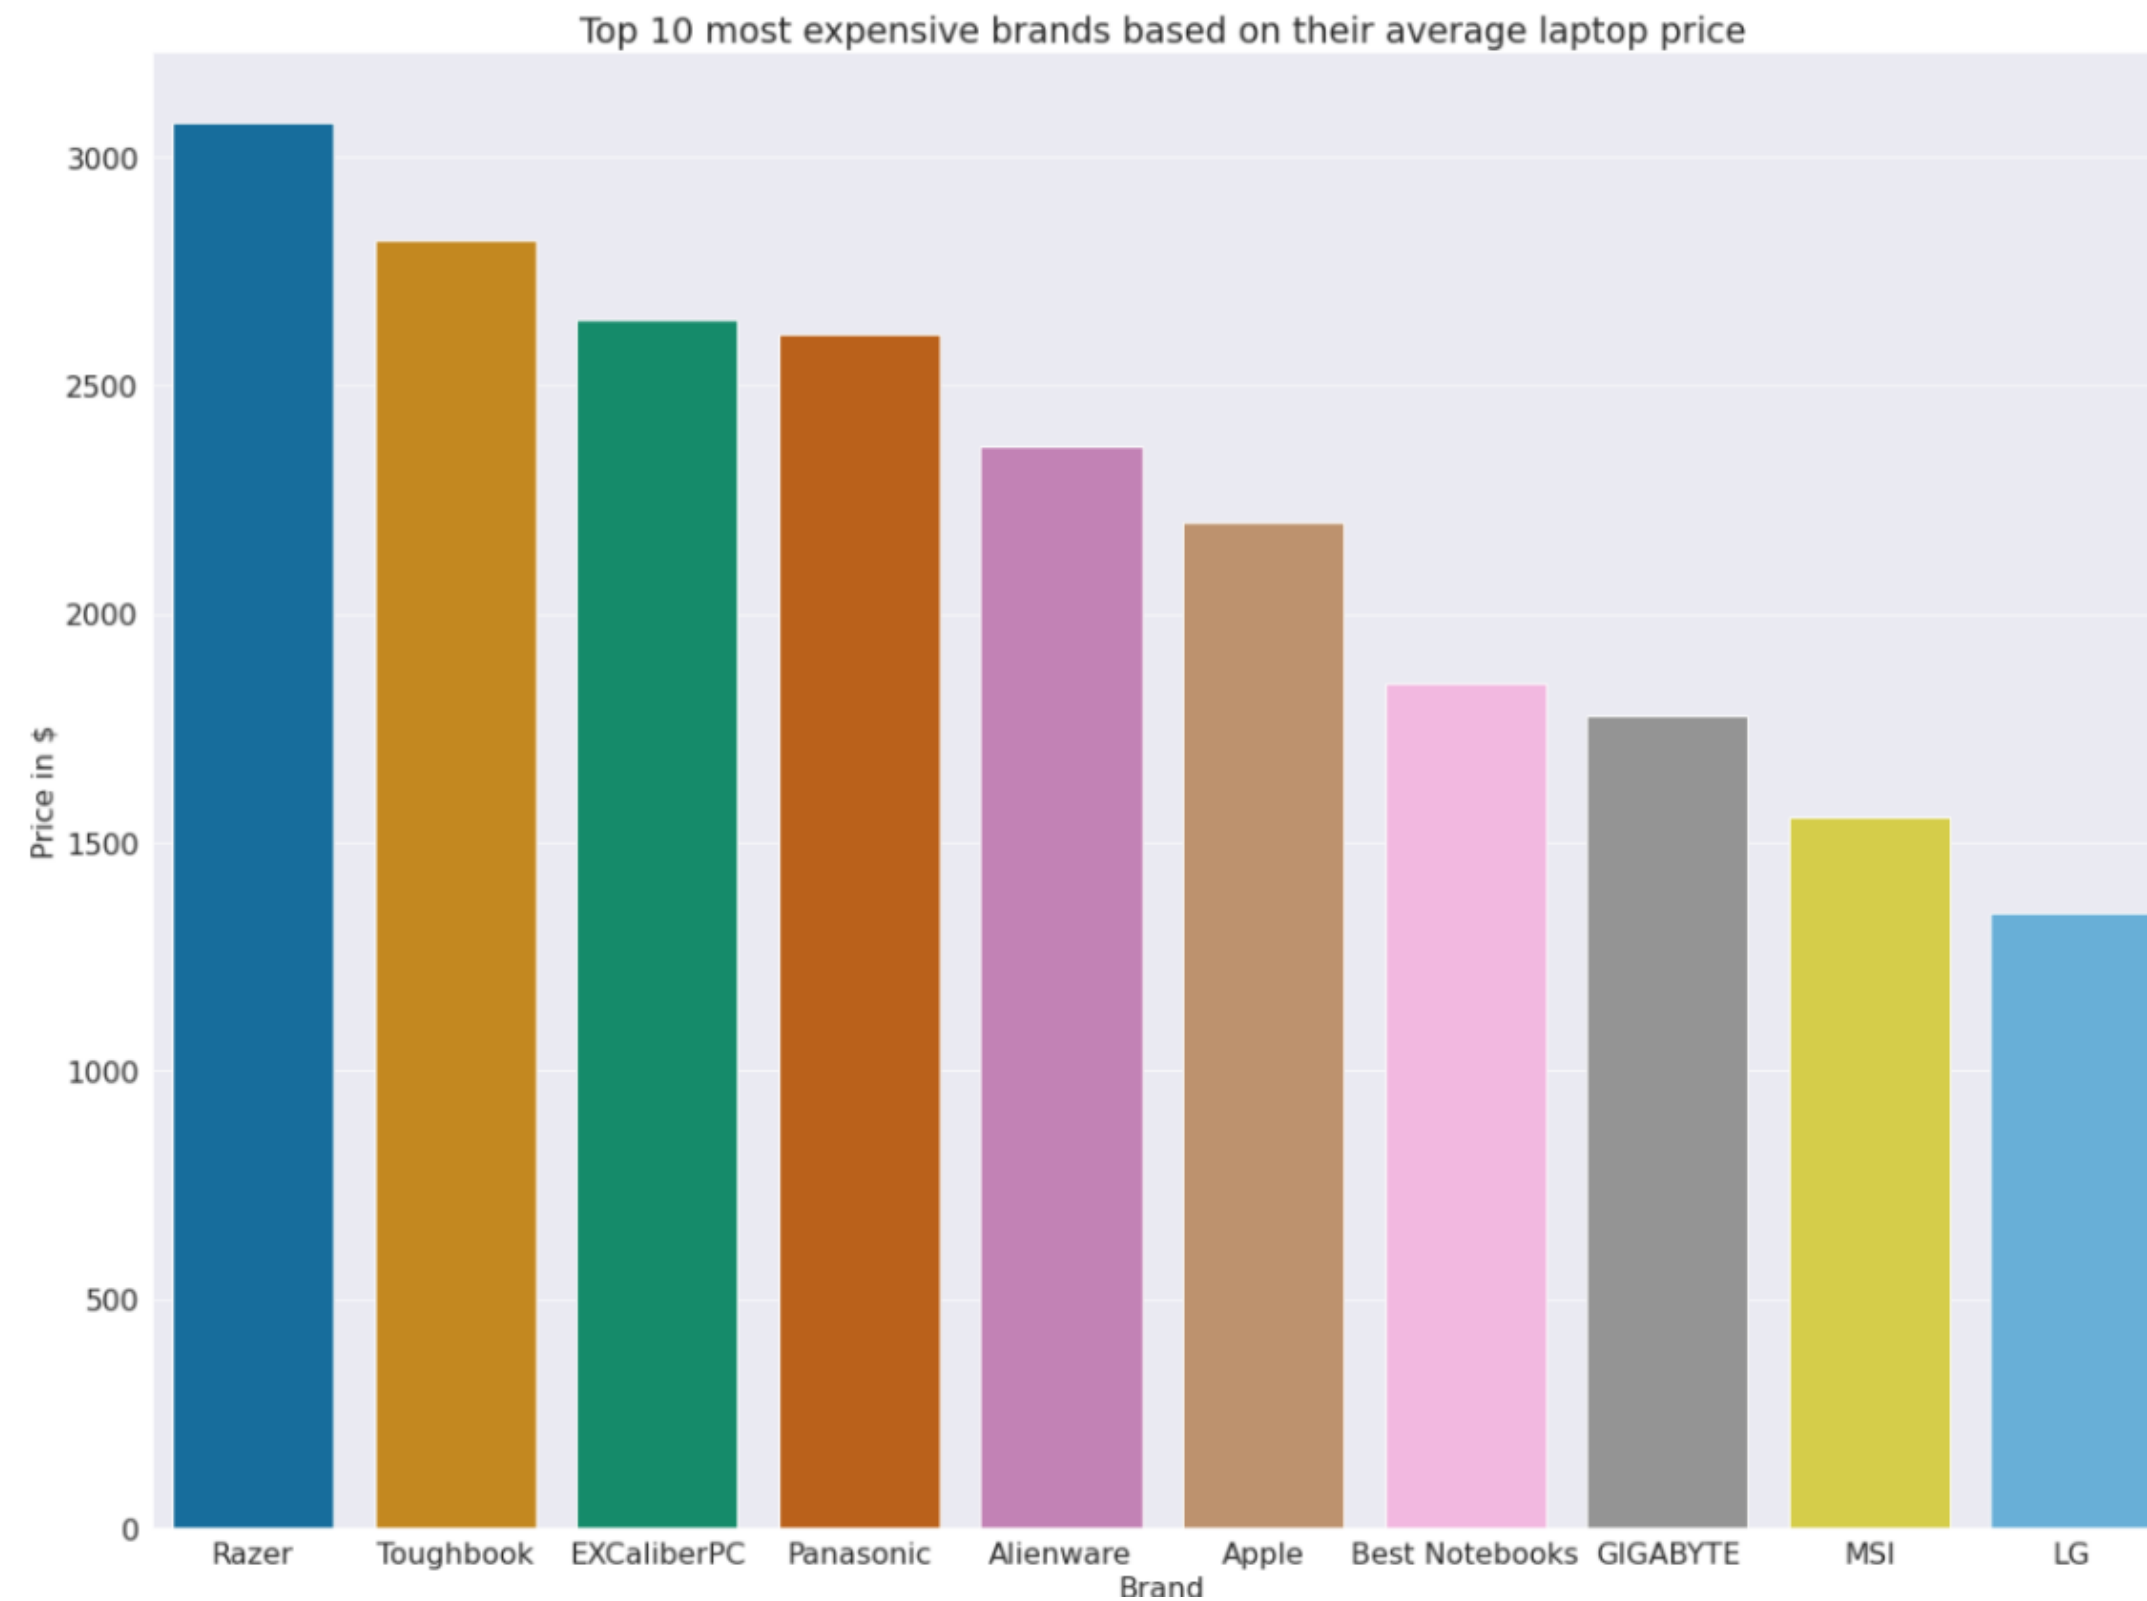

# Top 10 Most Expensive Laptops

# Top 10 Cheapest Laptops

# Top 10 Expensive Laptops Brands

# Top 10 Cheapest Laptops Brands

# Average Price Of Different Brands

RAZER HAVE HIGHEST  
AVERAGE PRICE

Most Razer laptops have above  
average price

USED HAVE LEAST AVERAGE  
PRICE

Similar story to previous case

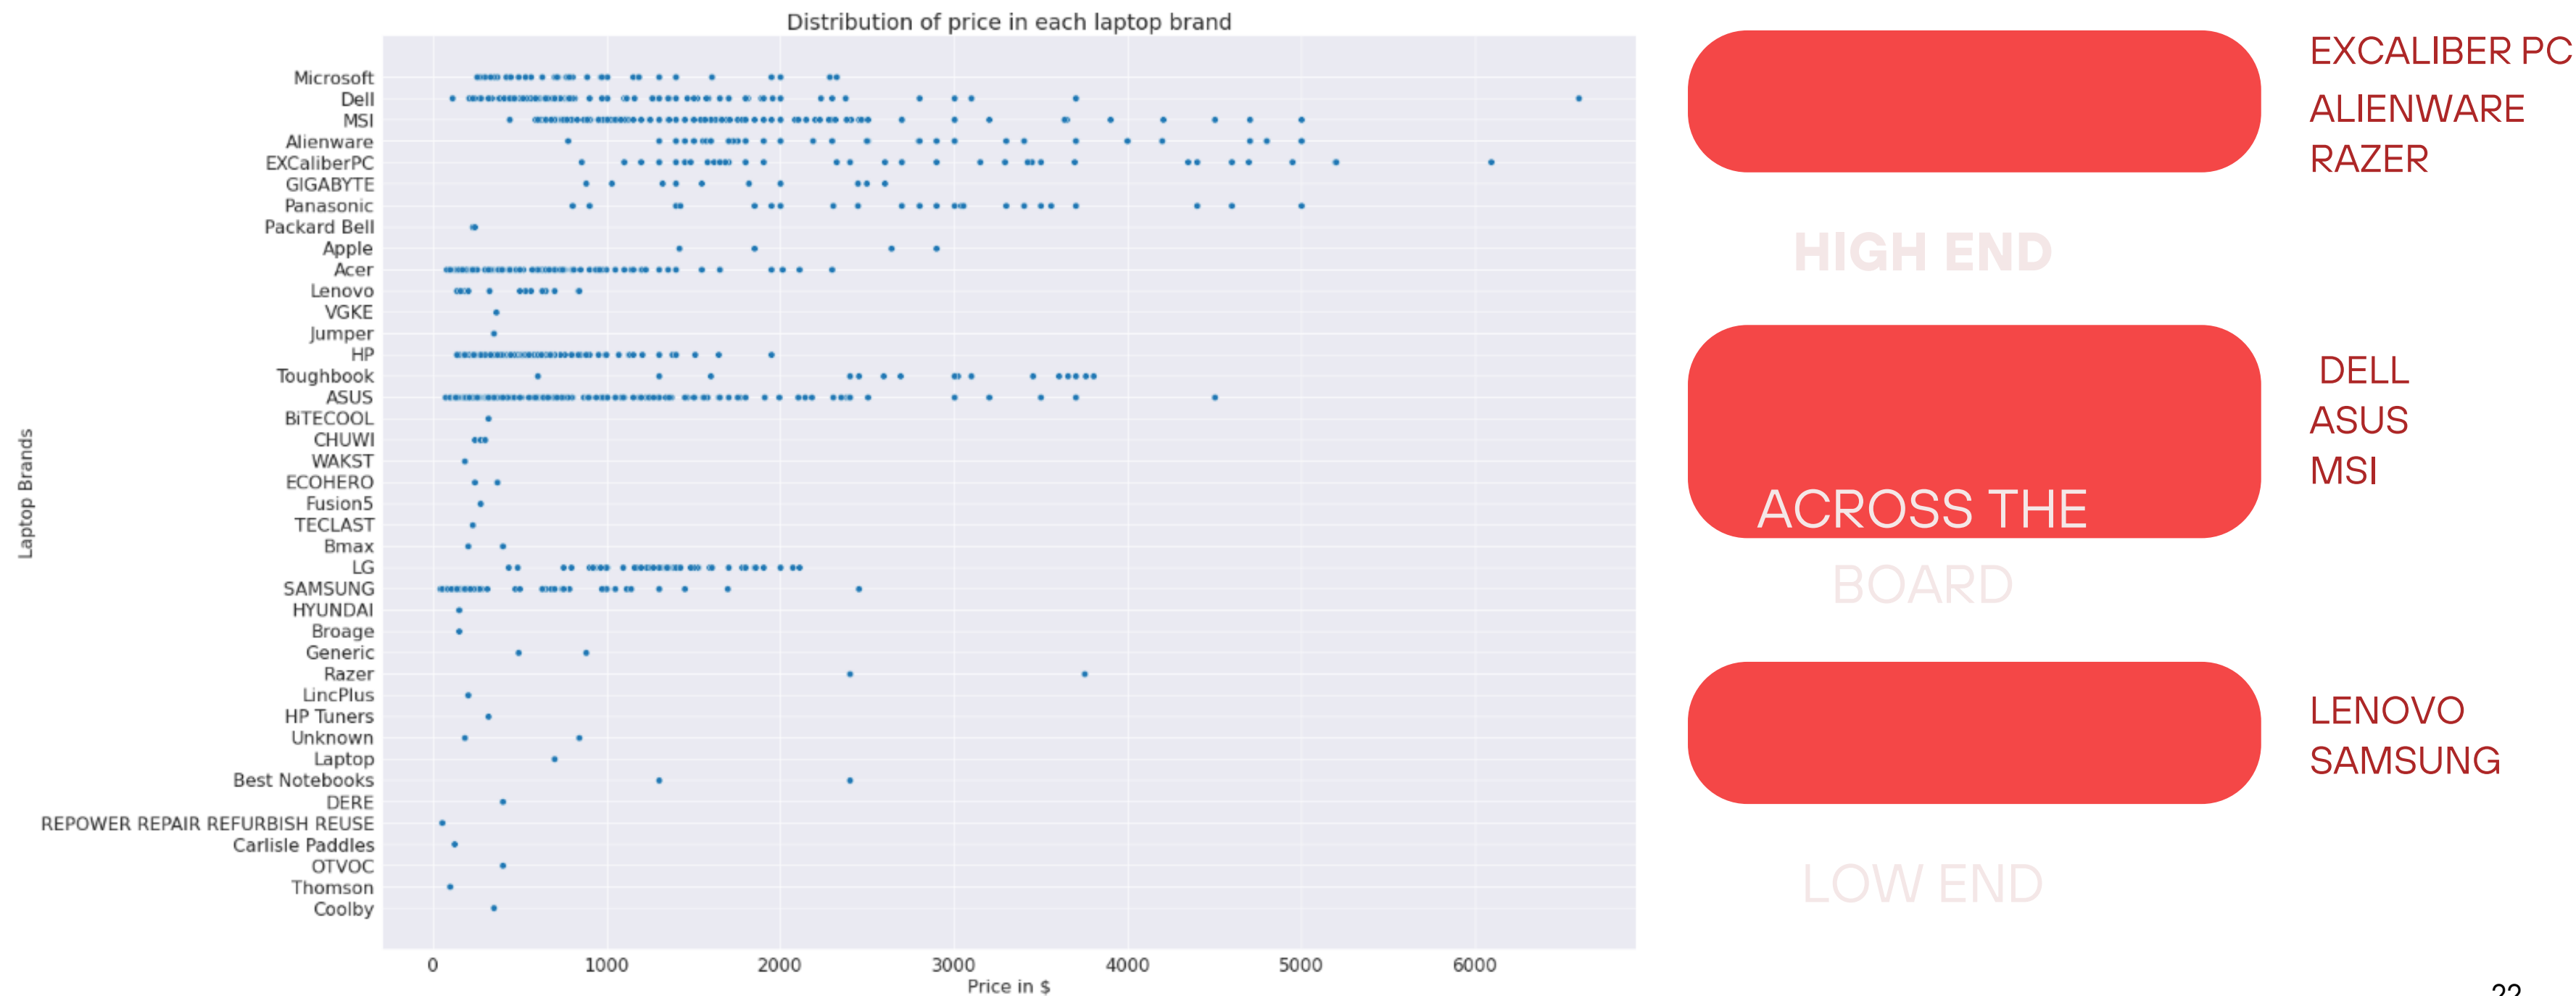

AVERAGE PRICE NEAR 1000  
DOLLARS

Brands like acer have varied pricing  
so have low average

# Distribution of Price Among Laptop Brands

Scatter plot of price against brands.

# About the Ratings

- Most are rated between 4 and 5 stars
- Significant amount rated 0-1 stars

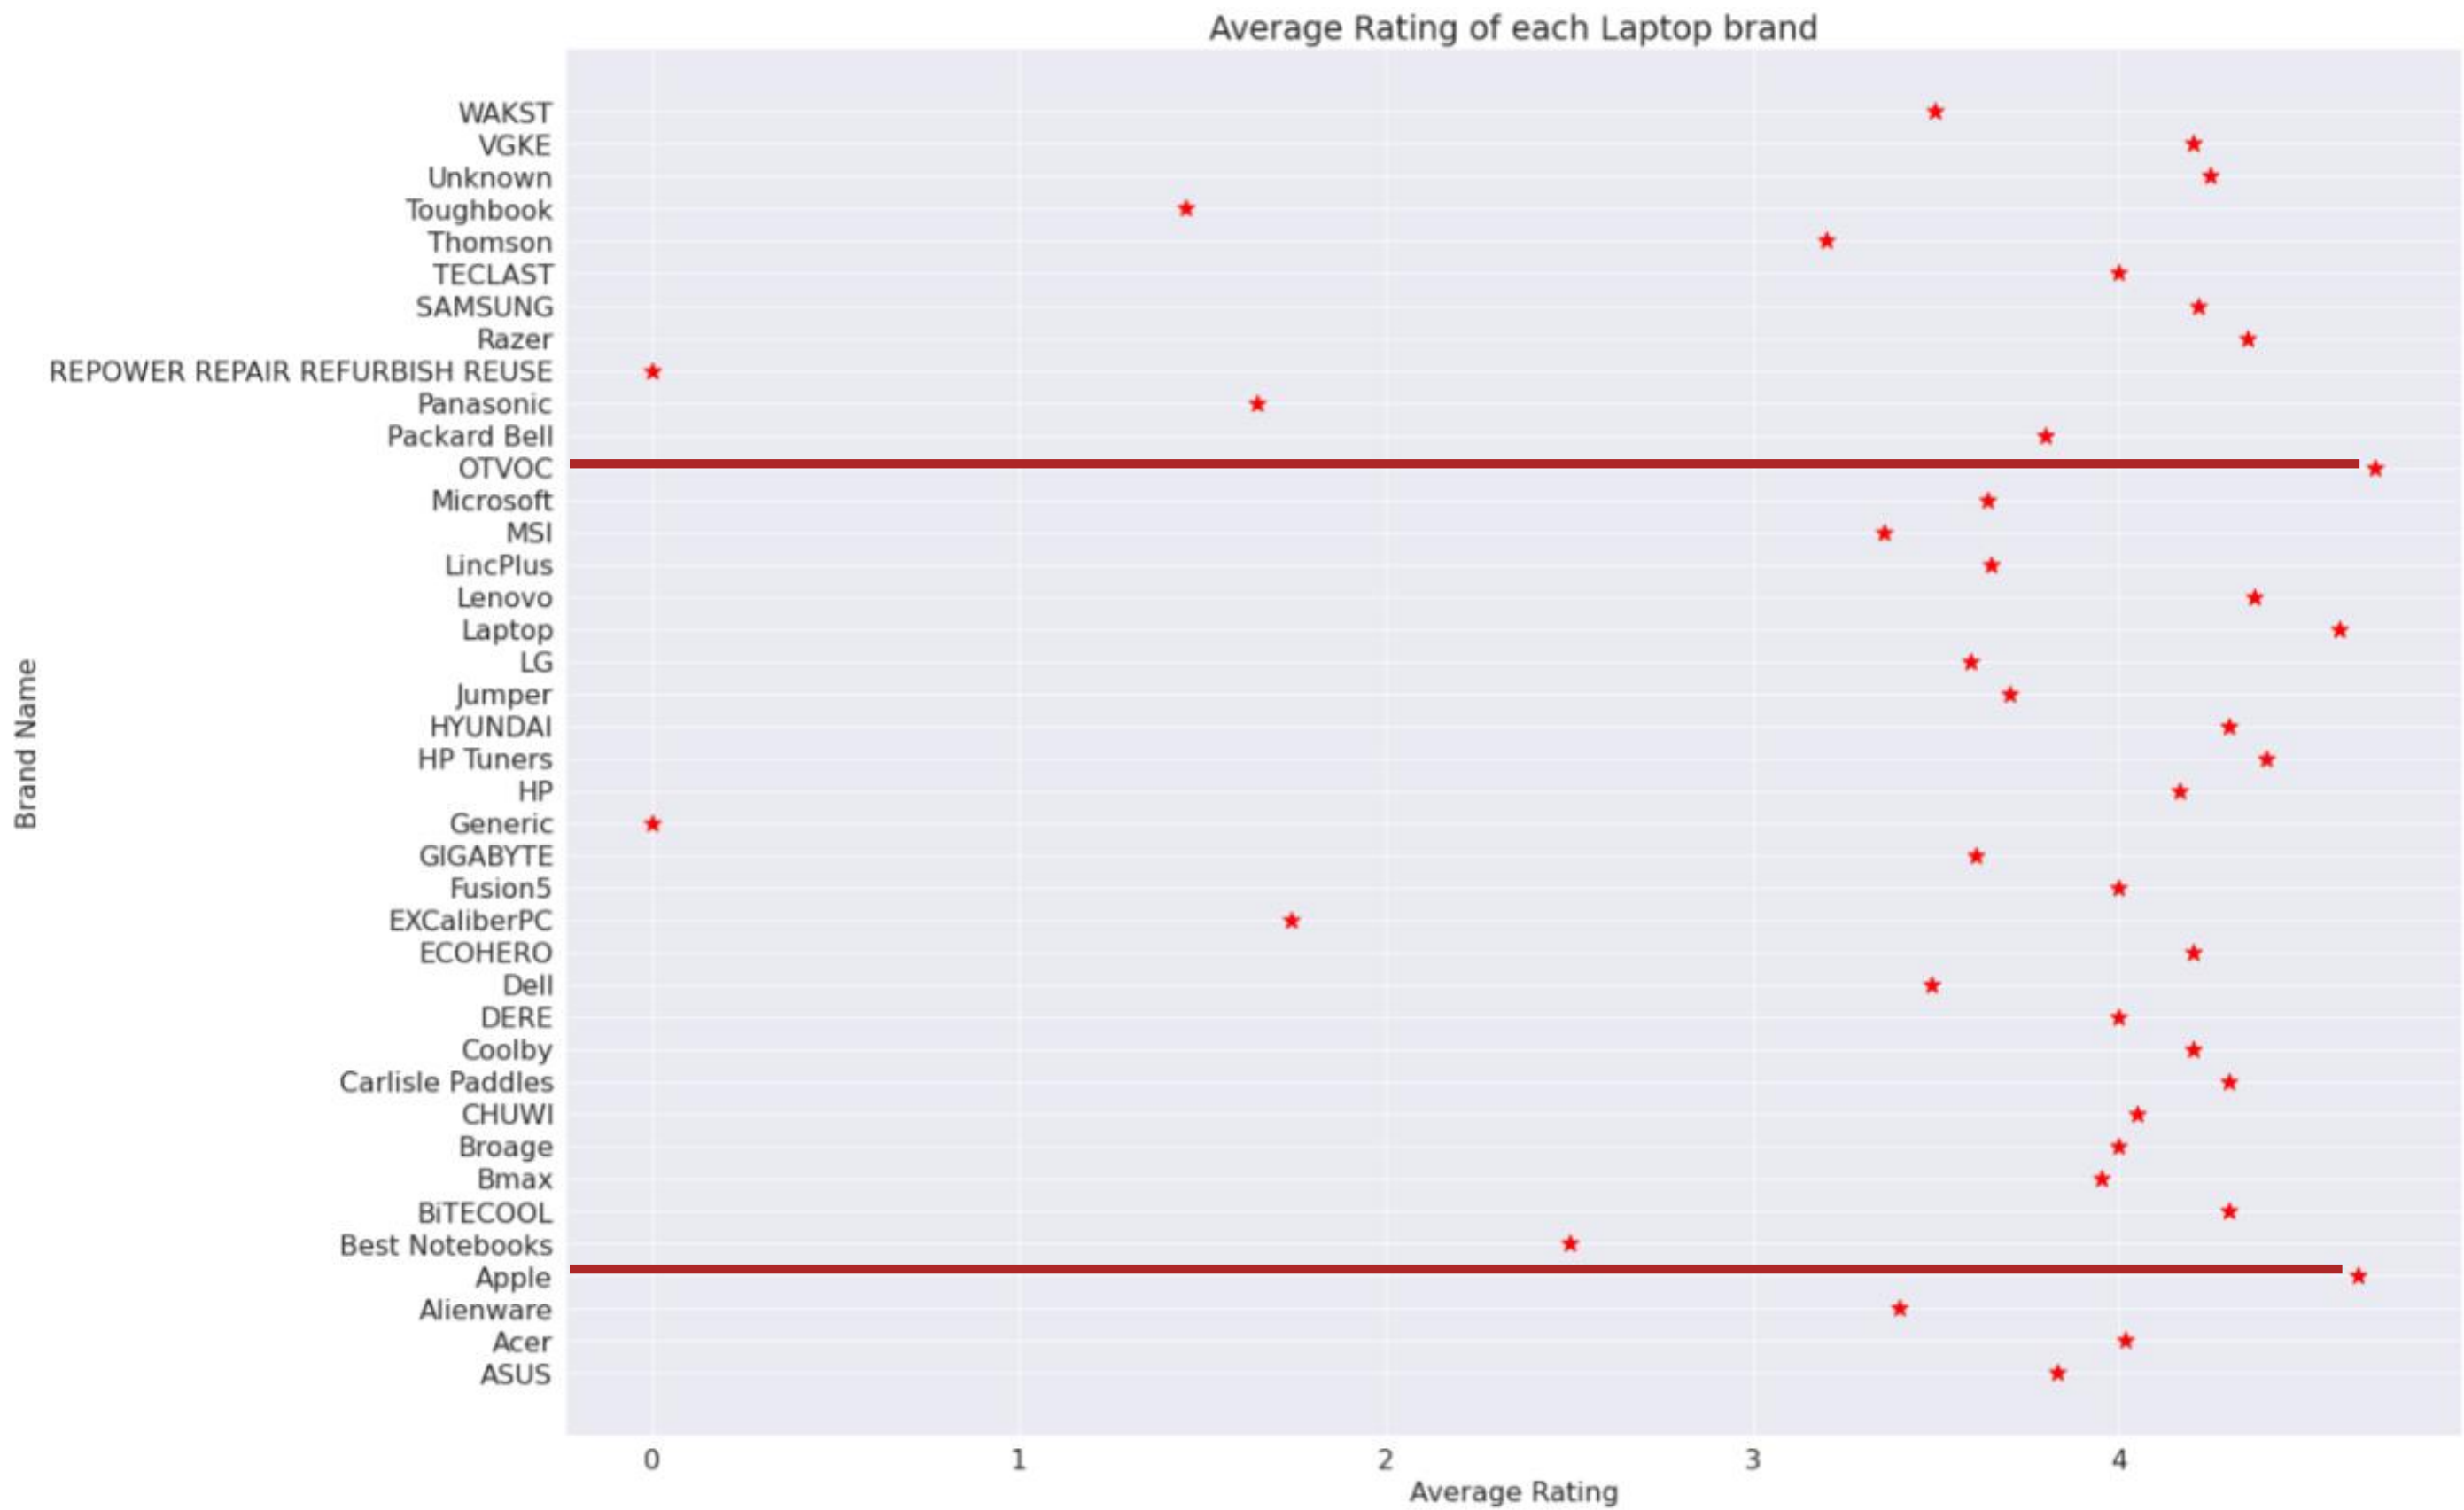

# Average Rating Of Each Laptop Brand

OTVOC & APPLE  
HAD HIGHEST  
AVERAGE  
RATING

Over 4.0 rating

REFURBISH &  
GENERIC HAS  
LOWEST  
AVERAGE  
RATING

Not Rated

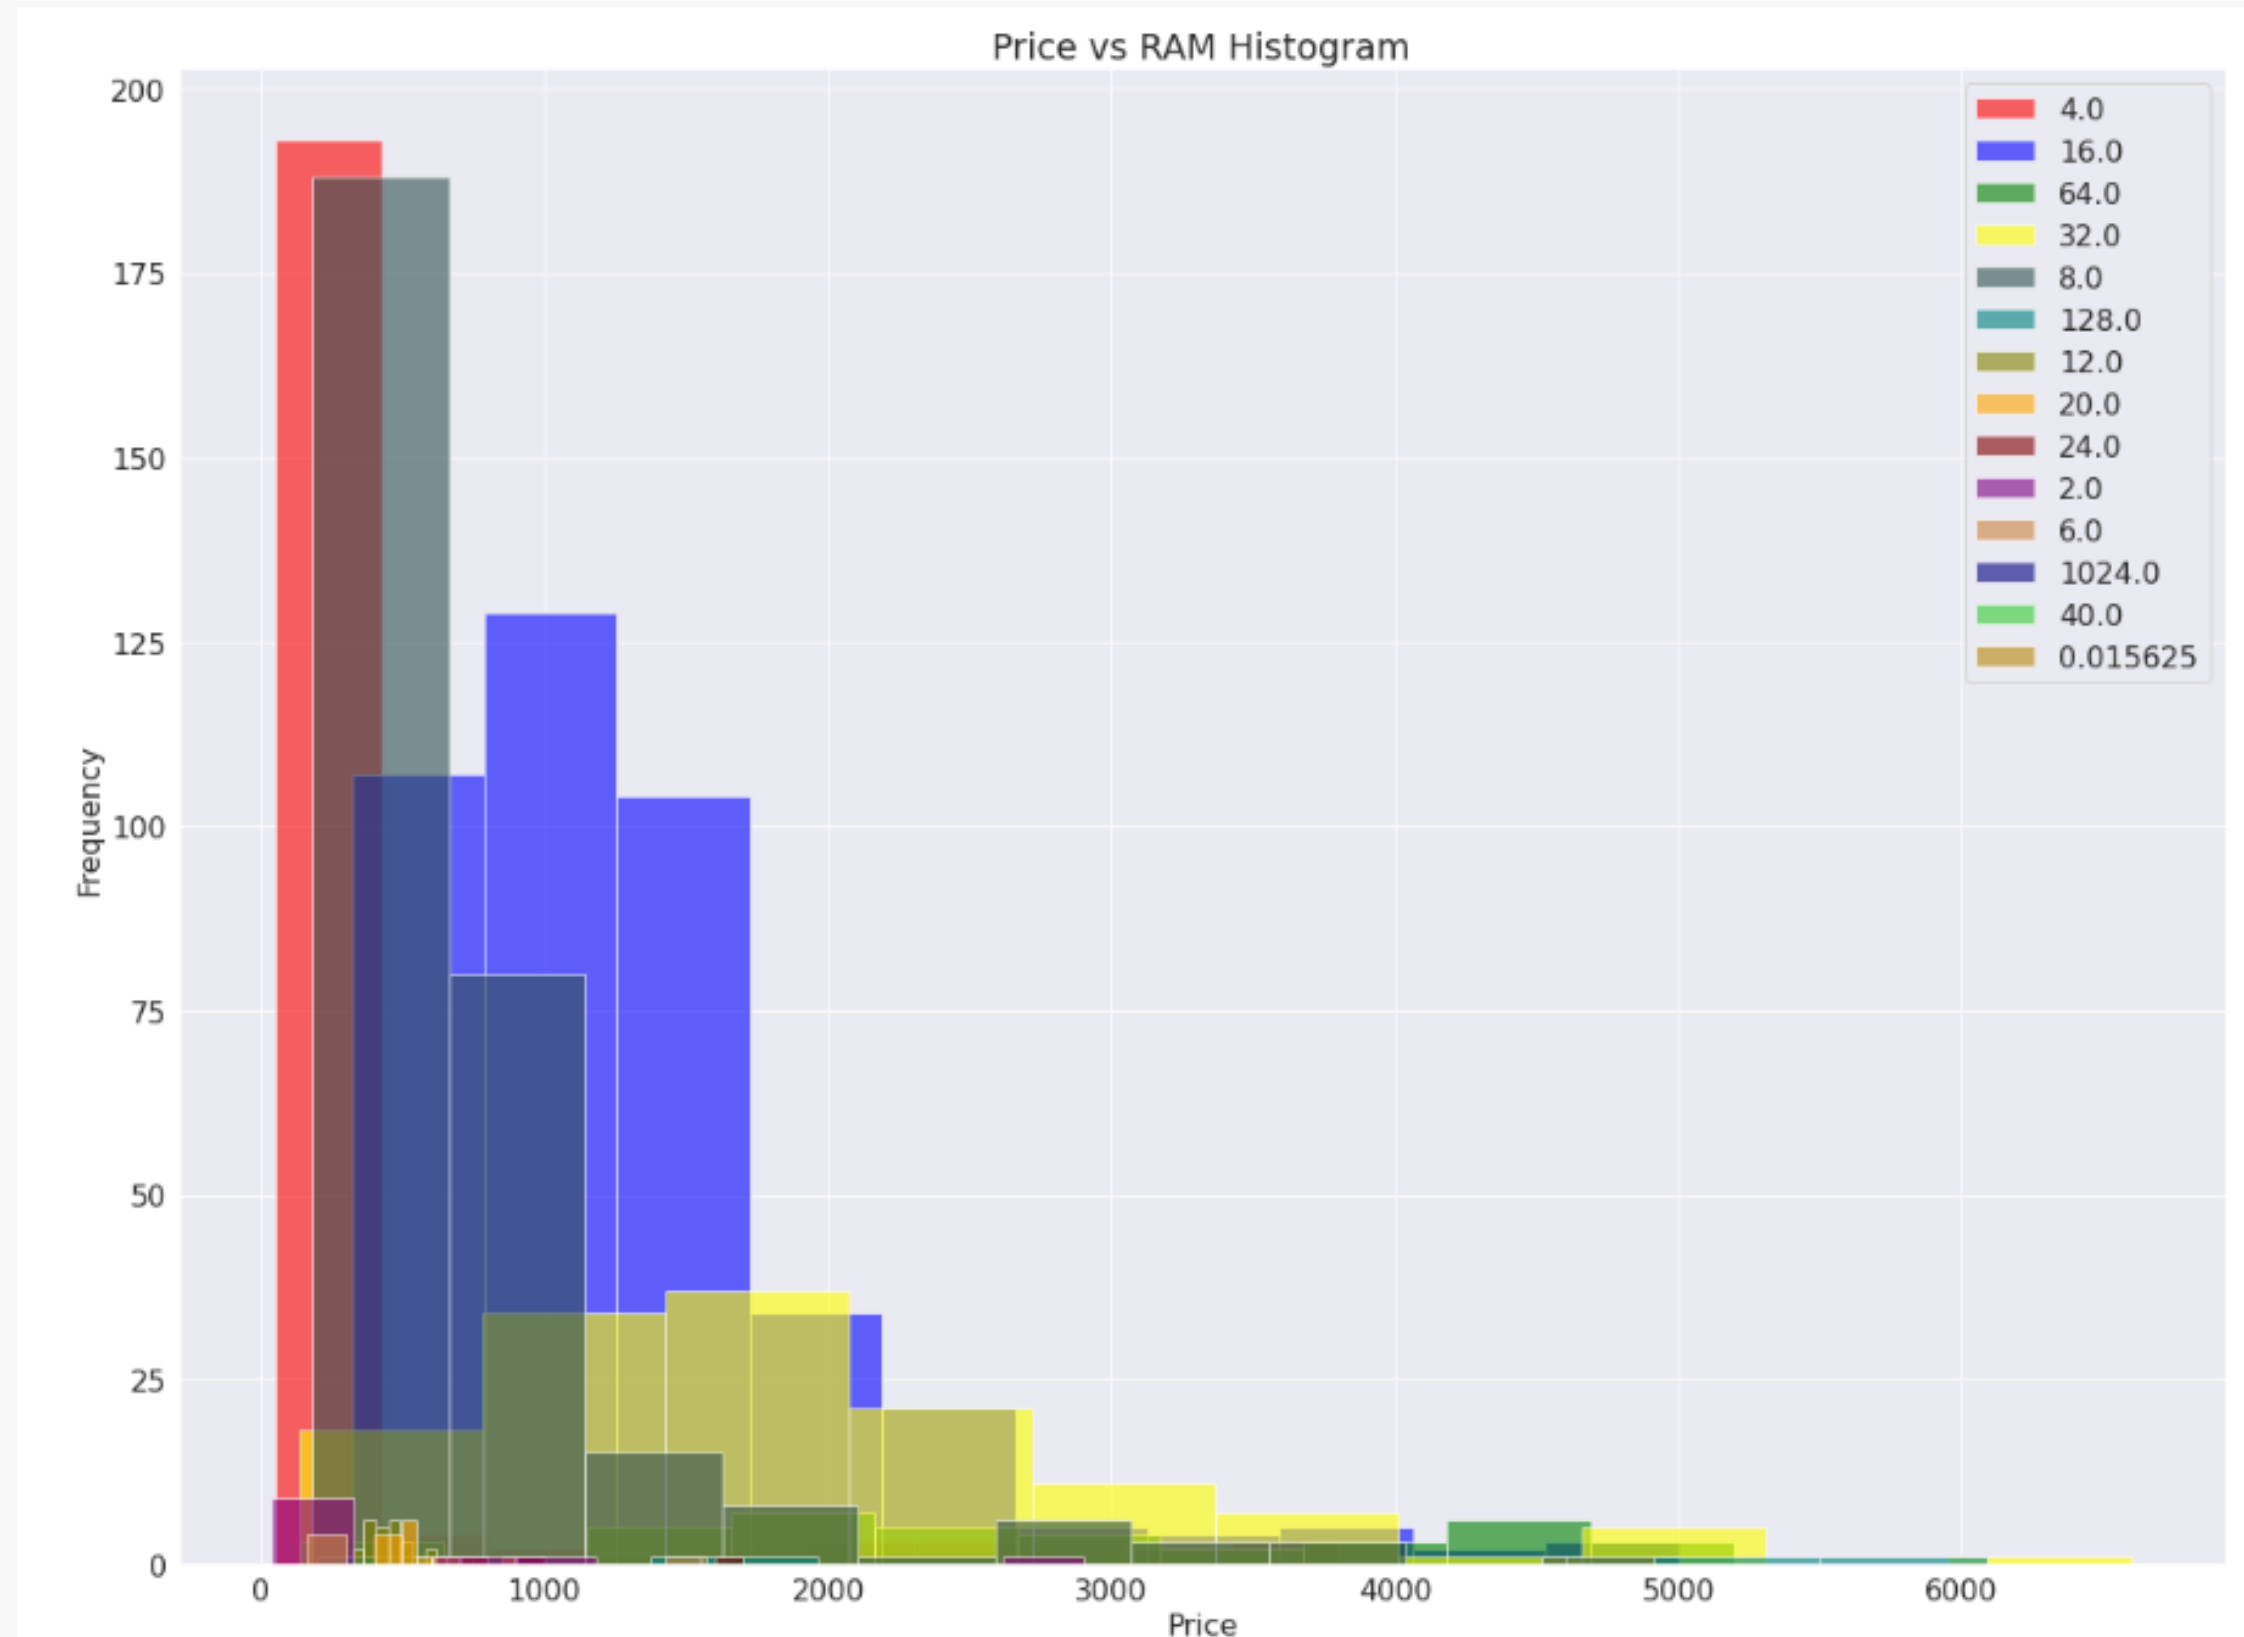

# Price V/s RAM Histogram

Shows that the laptops price mostly depends on RAM size.

4 GB RAM is most common and cheapest, followed by 8 GB and 16 GB

1TB RAM laptops are most expensive

# MAIN INSIGHTS

- Price changes with change in Screen size, RAM and Brand.
- Dell's Alienware and MSI's laptops take over top 10 most expensive laptops.
- Samsung Chromebook takes over top 10 most cheapest laptops.
- Razer is most expensive laptop brand followed by Toughbook and ExCalliber.
- Most laptops have 4GB RAM and is cheaper comparatively.
- Laptops with 32GB and 128GB RAM is expensive and less in number.

# Challenges

- Amazon has mechanisms to prevent scraping
- Joint ventures (Sub Brands)
- Irregularities in amazon pages
- Sellers other than the authorized distributor

# Conclusion

- Scraped Amazon laptop data
- Cleaned raw data
- Visualized data using Matplotlib and Seaborn
- Discovered insights and patterns
